Soumiya_Ayyappan_W3_D5

Step 1: Create the class

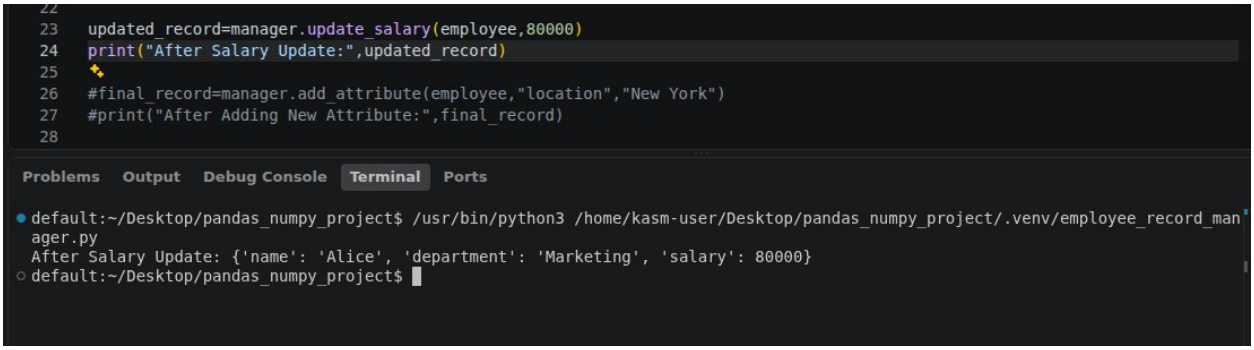

Step 2:

Step 3:

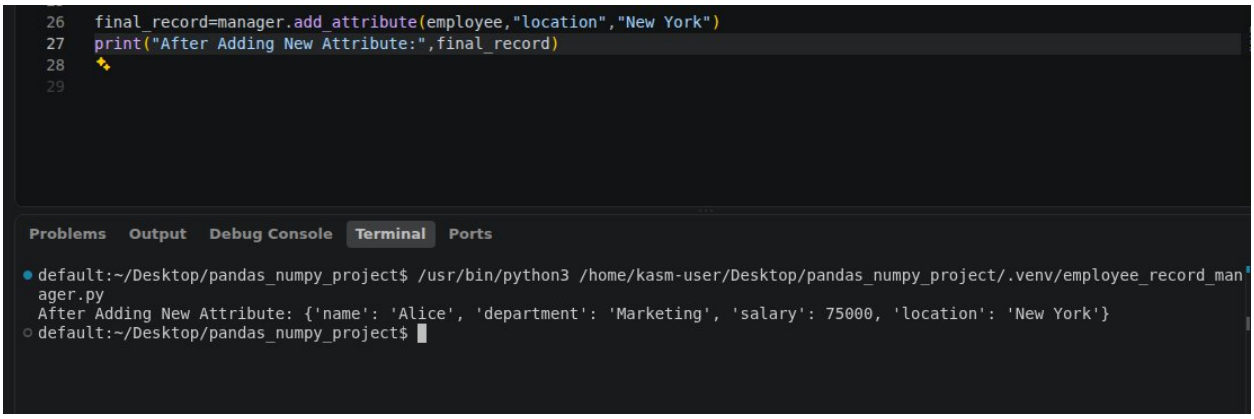

```
updated_record=manager.update_salary(employee,80000)
print("After Salary Update:",updated_record)

#final_record=manager.add_attribute(employee,"location","New York")
#print("After Adding New Attribute:",final_record)
```

```
Problems  Output  Debug Console  Terminal  Ports

default:~/Desktop/pandas_numpy_project$ /usr/bin/python3 /home/kasm-user/Desktop/pandas_numpy_project/.venv/employee_record_man
ager.py
After Salary Update: {'name': 'Alice', 'department': 'Marketing', 'salary': 80000}
default:~/Desktop/pandas_numpy_project$
```

Step 4:

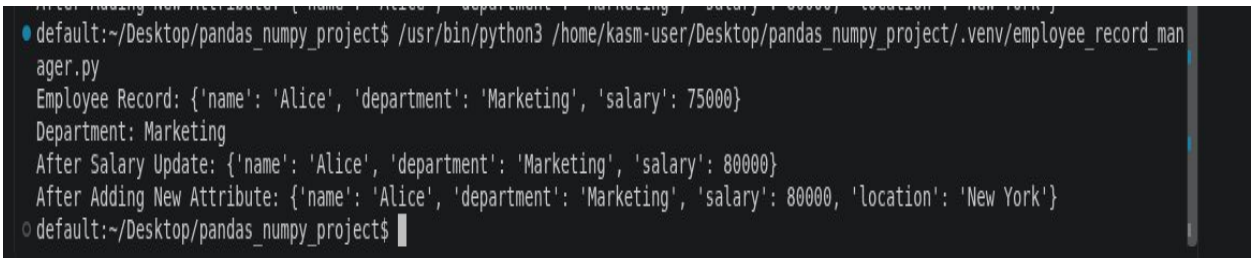

```
final_record=manager.add_attribute(employee,"location","New York")
print("After Adding New Attribute:",final_record)
```

```
Problems  Output  Debug Console  Terminal  Ports

default:~/Desktop/pandas_numpy_project$ /usr/bin/python3 /home/kasm-user/Desktop/pandas_numpy_project/.venv/employee_record_man
ager.py
After Adding New Attribute: {'name': 'Alice', 'department': 'Marketing', 'salary': 75000, 'location': 'New York'}
default:~/Desktop/pandas_numpy_project$
```

Full Output:

```
default:~/Desktop/pandas_numpy_project$ /usr/bin/python3 /home/kasm-user/Desktop/pandas_numpy_project/.venv/employee_record_man
ager.py
Employee Record: {'name': 'Alice', 'department': 'Marketing', 'salary': 75000}
Department: Marketing
After Salary Update: {'name': 'Alice', 'department': 'Marketing', 'salary': 80000}
After Adding New Attribute: {'name': 'Alice', 'department': 'Marketing', 'salary': 80000, 'location': 'New York'}
default:~/Desktop/pandas_numpy_project$
```
