Soumiya Ayyappan_W4_D3

Step 1: Load the Dataset

```
.venv > visualplot.py > ...
1   import pandas as pd
2   import matplotlib.pyplot as plt
3   df=pd.read_csv("/home/kasm-user/Downloads/sales_data.csv")
4   print(df.head())
5
```

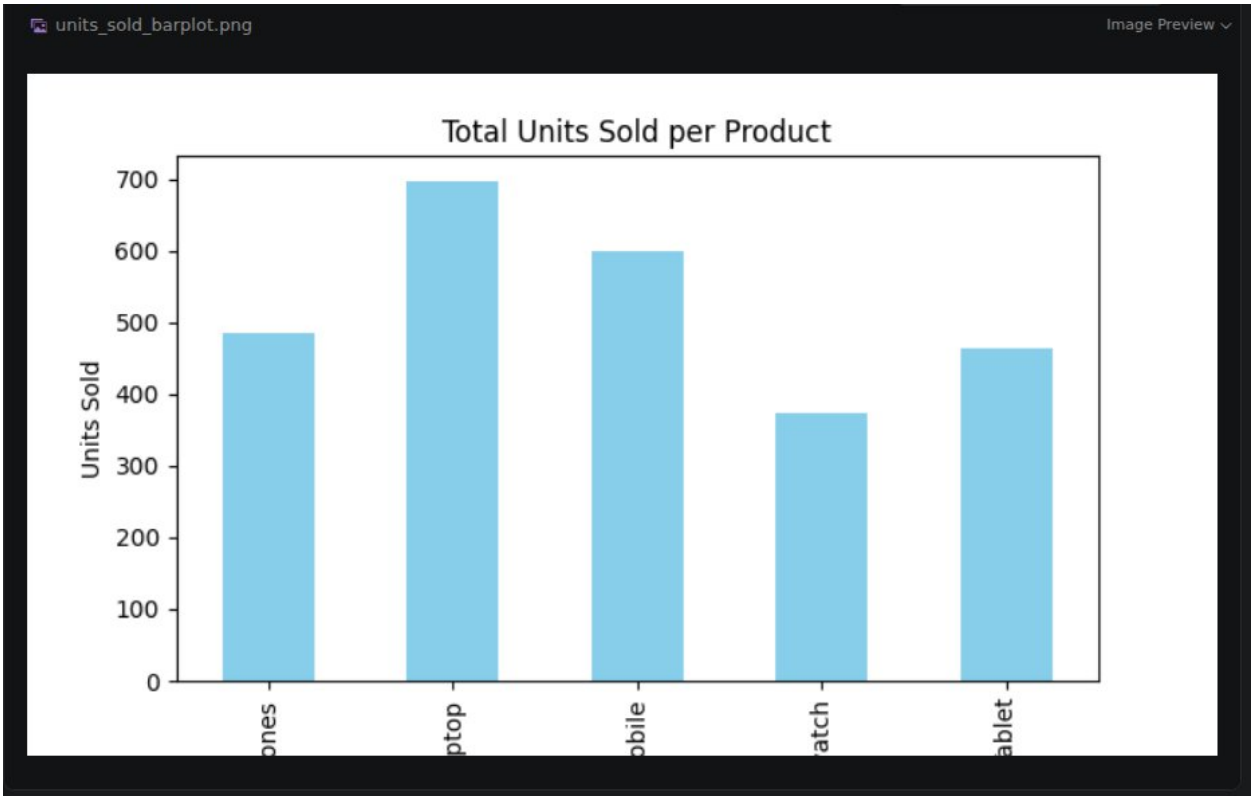

Output:

```
default:~/Desktop/pandas_numpy_project$ /usr/bin/python3 /home/kasm-user/Desktop/pandas_numpy_project/.venv/visualplot.py
         Date Product  UnitsSold  Revenue
0  2026-01-01  Laptop          6   378144
1  2026-01-02  Mobile         19   466868
2  2026-01-03  Laptop         48  3875568
3  2026-01-04  Laptop         42  3051342
4  2026-01-05  Laptop          6   306840
```

Step 2: Create a Bar Plot

```
6   plt.figure(figsize=(7,4))
7   df.groupby("Product")["UnitsSold"].sum().plot(kind="bar",color="skyblue")
8   plt.title("Total Units Sold per Product")
9   plt.xlabel("Product")
10  plt.ylabel("Units Sold")
11  plt.savefig("units_sold_barplot.png")
12  plt.show()
13
```

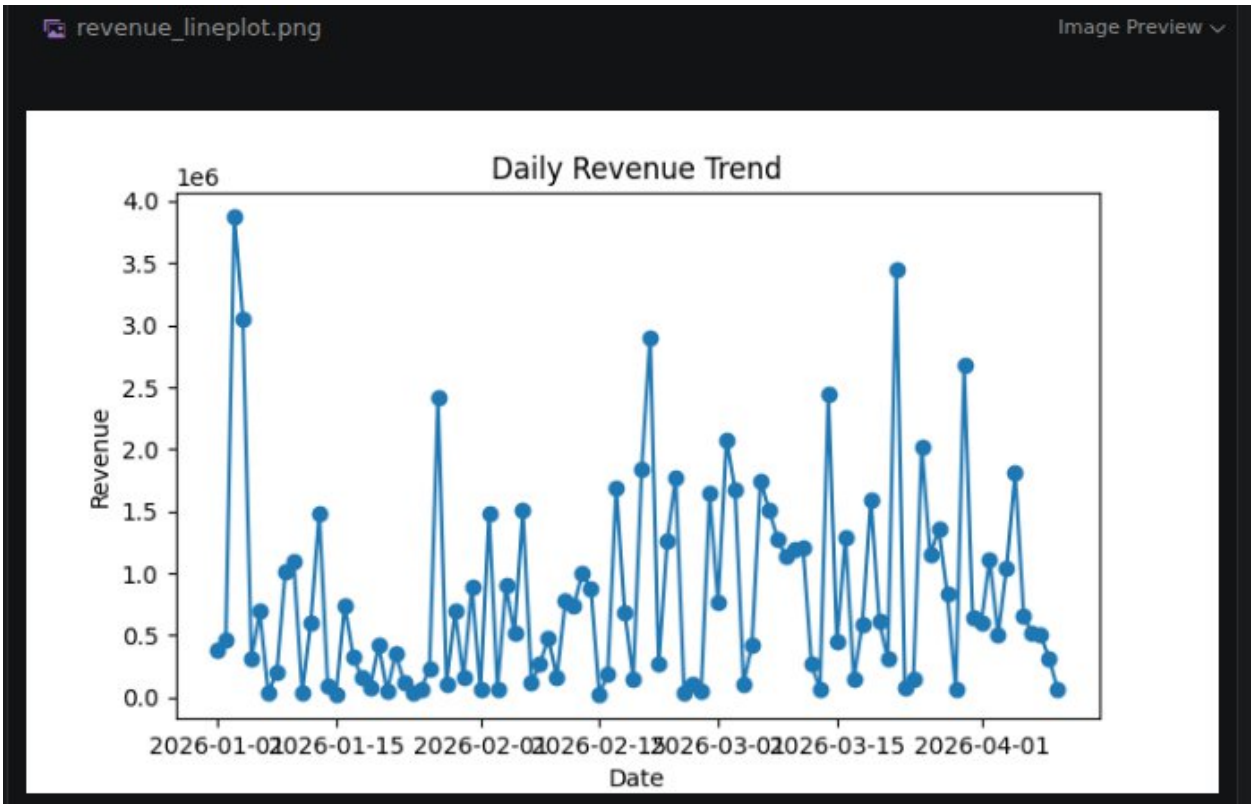

Output:

Step 3:Create a line Plot

```
plt.figure(figsize=(7,4))
df["Date"]=pd.to_datetime(df["Date"])
df_sorted=df.sort_values("Date")
plt.plot(df_sorted["Date"],df_sorted["Revenue"],marker="o"
plt.title("Daily Revenue Trend")
plt.xlabel("Date")
plt.ylabel("Revenue")
plt.savefig("revenue_lineplot.png")
plt.show()
```

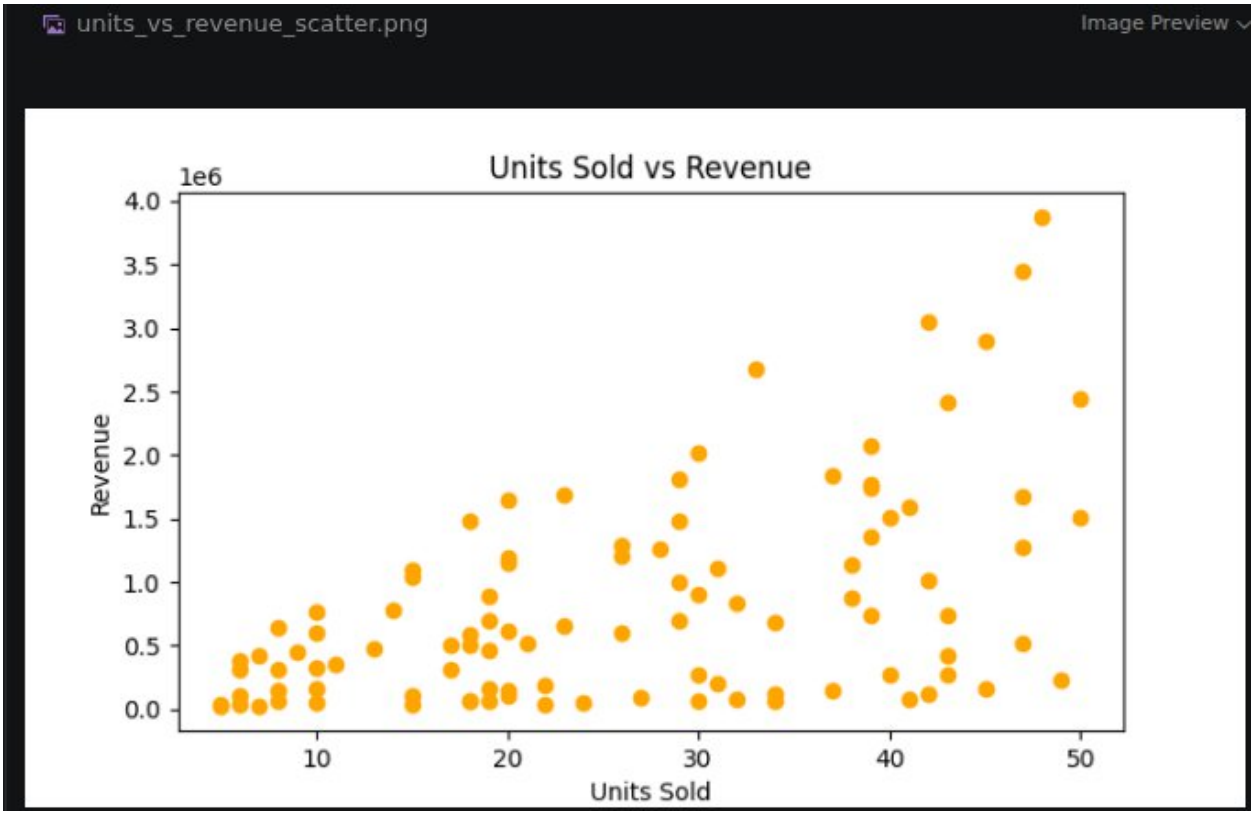

Output:

Step 4:Create a Scatter Plot

```
24  plt.figure(figsize=(7,4))
25  plt.scatter(df["UnitsSold"],df["Revenue"],color="orange")
26  plt.title("Units Sold vs Revenue")
27  plt.xlabel("Units Sold")
28  plt.ylabel("Revenue")
29  plt.savefig("units_vs_revenue_scatter.png")
30  plt.show()
```

Output:

units_vs_revenue_scatter.png
